

the art of style

Our trend-setting team of designers continually introduce new colors, new styles, and new fabrics, because we know it's not enough that our products provide the most effective Robotic Massage® on the market. To deserve a place in your environment, our chairs must be great looking as well as therapeutic.

It's our way of saying we understand what you want.

the science of comfort

Everyone likes to feel good. At **Interactive Health®**, it's all we think about.

Our team of scientists, researchers, and engineers analyze the treatments used by massage therapists, chiropractors, and physicians, and turn those techniques into the sophisticated **Human Touch Technology®** mechanisms that animate our family of chairs. By building on our decades of experience as the world leader in massage technology, we consistently produce the most advanced Robotic Massage® systems ever devised.
