

zero gravity

the vision

At Interactive Health, our vision was to create a chair so extraordinary it would be called The Perfect Chair®. Artfully blending contemporary architecture with traditional design, our Director of Design, David Potter, created the chair's bold yet classical look. By integrating our unique zero-gravity technology, then selecting the most sumptuous materials, we created a neutral body posture chaise that transcends common comfort. Truly, the Perfect Chair®.

When given the opportunity to design a "perfect" chair, I recalled that classically designed chairs exploit the natural beauty and appealing familiarity of human proportion. This was also the key to the appeal of Renaissance architecture. Basic visual cues subconsciously invite you to interact with well-designed buildings or objects. So I chose to take a classic approach; get the human proportions right and aesthetics and comfort are quick to follow.

Aesthetics, engineering, comfort, health - we took care of the hard parts. All you have to do is sit down.

-David Potter

the design

With the discipline and wisdom that can only come from years of experience, we carefully researched and selected each component that would make our dream chair a reality. Aesthetically and technically, the Perfect Chair® reflects Interactive Health's commitment to manufacture products of superior quality and value.

aerospace science and ergonomics

Not by coincidence, the body frame ergonomics are inspired by the neutral body posture chaise position developed by NASA to support astronauts during their ascent into orbit. Modified for use in stationary applications and incorporating our multi-patented technology, the Perfect Chair® body frame is designed to provide years of comfort and can accommodate individuals weighing up to 285 lbs.

Ergonomically shaped, articulating head rest cushion cradles the neck for perfect support

Easy-to-use brake control system with Meclok™ brake allows precise position control and is extremely reliable

The new PC-8 Perfect Chair

Once in a while a product comes along that seems different... something that not only serves its purpose, but redefines it, a product with craftsmanship that goes beyond the norm. It's design has a look that is everlasting. Something like this has only one word to describe it. Perfect.

Introducing the newest member of the family... The Perfect Chair-8

Features include:

- Generous leather/leather match cushions for a soft touch and furniture springs for superior comfort seating
- Multi-patented construction throughout means the Perfect Chair® is one of a kind
- Extra wide leg rest provides maximum comfort
- Exclusive guide rail system ensures smooth recline motion
- Available in Black, Cashew & Red
- Interior woodbase
- The neutral body posture chaise position elevates your legs above your heart, relieving weight from your spine. Doctors recommend this as the healthiest way to sit.

The zero-gravity recline of the Perfect Chair® offers a unique experience. As your feet rise above your heart, pressure is removed from your spine, allowing absolute surrender to deep relaxation.

Available in Black
